## Summary

---

- To grow professionally through continuous learning while contributing my skills to the success and growth of the organization.

## Education

---

- **St. Xavier's College, Palayamkottai**  
Bachelor of Computer Application  
CGPA: 7.4

## Skills

---

- Front-End: HTML, CSS, JavaScript, React
- Back-End: PHP, Node.js
- Database: Oracle, PostgreSQL, MySQL

## Experience

---

- **RORIRI ITPARK,NALLANATHAPURAM**  
SOFTWARE DEVELOPER  
Developed responsive web applications using React.js, JavaScript, HTML, CSS, and Tailwind CSS. Integrated REST APIs and collaborated with backend teams. Developed modules using Java, PHP, and Node.js. Worked with MySQL and PostgreSQL databases. Performed manual testing, debugging, and bug fixing. Optimized application performance and user experience. Used Git/GitHub and participated in Agile development. Delivered multiple client and internal projects, ensuring successful project completion and continuous professional growth.

## Projects

---

- **Trust Management**  
Developed a Trust Management web platform to connect food providers with local trusts for food donations. The system provides real-time trust details, requirements, and contact information based on location. Implemented search functionality to match providers with trust needs efficiently. Built the frontend using HTML, CSS, and PHP with MySQL for backend data management. Improved community collaboration by simplifying and streamlining the donation process.
- **Human Resource Management System (HRMS)**  
Developed a Human Resource Management System (HRMS) using React for frontend, Node.js for backend, and PostgreSQL for database. Implemented employee management, attendance tracking, leave requests, and admin dashboards. Designed RESTful APIs and integrated frontend with backend services. Ensured secure authentication, role-based access, and data validation. Focused on responsive UI, performance optimization, and scalable architecture.
- **Roshan Traders**  
Developed a full-stack business management system for Roshan Traders to handle products, stock, billing, logistics, and financial reports. Built a responsive frontend using React.js and Tailwind CSS with a secure Node.js & Express backend. Integrated PostgreSQL for efficient and optimized data management. Implemented authentication, role-based access, invoicing, and real-time dashboards. Automated reports and streamlined daily business operations, reducing manual work.
